

Integration Capabilities

SCHEME & EQUIPMENT, INC. ENGINEERED HANDLING SYSTEMS

Your complex material handling project is not just deciding what equipment to purchase. Scheme & Equipment, Inc. has the capability to work with you by defining the goals of the project, determining the necessary flow, selecting the appropriate equipment, reviewing integration compatibility, specifying accessory needs, drafting layout drawings, providing equipment supply, performing mechanical installation, delivering all controls and software, supplying all field wiring, plus coordinating all start-up and training needs.

Our abilities can encompass all of your process and handling needs from raw material delivery through your value-added production process, into any side storage or accumulation needs, and finally through the packaging and shipping functions.

Every project and every Process is different, so our proposal to you will include the elements we anticipate providing for your custom project. If we fail to anticipate an element you need from us, simply ask us for a revision that includes that element.

Conveyors * Process Equipment * Packaging Equipment * Implementation

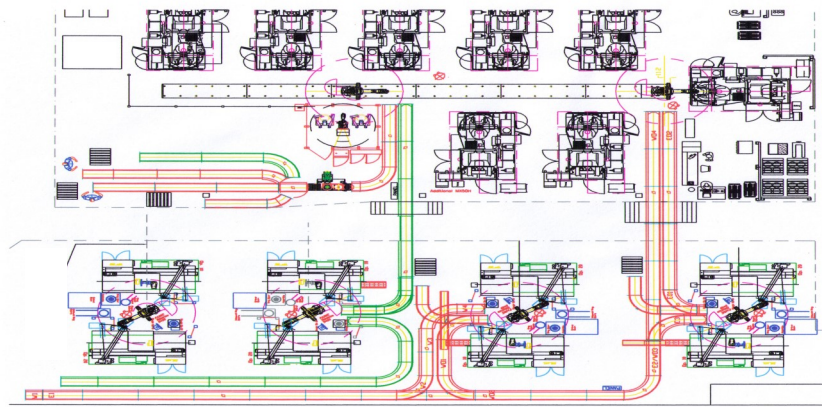

SCHEME & EQUIPMENT, INC.

1440 Maple Avenue, Unit 9A, Lisle, IL 60532

Integration Capabilities

Let us show you our integration expertise:

- Goals development, flow clarification
- Production line or storage layouts
- Ergonomic improvements
- Human and machine interfaces
- Process equipment solutions
- Layouts of Pre-engineered conveyors
- Custom handling equipment solutions
- Packaging Equipment lines
- Controls & Programming supply
- Project Management
- Installation, Start-up, Operator training
- ISO Equipment & Training assistance

Sales Outlets

Sales Organizations that offer the various products of Scheme & Equipment, Inc. are readily available for your convenience. Call us today so that we can define your interfacing needs based upon criteria like market experience, Location, Complimentary Products, Personality, and Project Complexity. We will find a good match!

Scheme & Equipment, Inc. (SEI) was incorporated in 1966 as a Delaware Corporation. Later that same year, SEI was licensed in the state of Illinois. From 1966 through 1988, SEI was a wholly-owned subsidiary of a Consulting Engineering Company. That Engineering Firm is involved in Capital expansion programs. SEI is now an independent Corporation, but the two Companies still cooperate occasionally on projects.

In the early years, SEI was involved in primarily bulk material handling (agricultural products, salt, mining, gravel, quarrying, etc.). The local decline of heavy industries in the early 1970's led to a diversification into unit (package, pallet, product) handling. These product lines were followed during the 1990's by a move into the sale and implementation of Packaging Equipment lines. Meanwhile, many industrial customers sought assistance from SEI in installing their new facilities. Increased expertise led to the ability to do large turnkey projects.

Today, Scheme & Equipment, Inc. is involved in the developing and implementing of bulk and unit material handling projects, and the supply of process and packaging equipment products (altogether more than 90% of our work), plus specialty construction for industrial, commercial and institutional customers (the remainder). No consumer products are offered.

Sales are nationwide, with a high percentage in the Midwest. SEI also exports equipment. Our Clients range from one-man shops to the Fortune 100. A large percentage of sales are through resellers or representatives, but direct sales are also offered to some customers.

A FULL HAND OF LITERATURE

Featuring Our Other Material Handling Products!

We hope that you are pleased with our Project Integration Capabilities Flyer. Please visit our Website or Call for our other literature pieces. Those pieces are dedicated to the areas of Case Studies, Packaging & Process Solutions, Conveyor Equipment, and to our skills in Project Implementation. Feel free to reach our sales department at 630-963-0630 for more information or for any application and specification assistance that you may require to move your project forward.
